Personnel Edit Subsystem (PINE) Edit Messages

This is the Web version of the PINE procedure. If you compare this version to the hardcopy, you may see the following differences:

- **In all procedures**, fonts have been changed for web publishing, and as a result, some shifting in text may have occurred.

- **In amended procedures**, the amended pages (if any) have been interfiled, and where applicable, point pages were eliminated. As a result, repagination may have occurred. Also, amendment marks (arrows and stars) have been removed, and amendment numbers in the footer have been replaced with an issue date.

This document is hyperlinked for easy navigation. To find information, just search the **Table Of Content**s or the **Heading Index** and then click the listing to jump to the corresponding text. You can also use the word search feature in Adobe Acrobat.

Note: When you're jumping from topic to topic, you may need to set Acrobat's zoom feature to view full pages. Otherwise, if the topic you're jumping to is in the lower part of a page, you'll have to scroll to locate it. For instructions on using the zoom feature, see Adobe Acrobat's online help.

For information about this publication, please contact the Directives and Analysis Branch (DAB).

About This Procedure

This procedure lists Personnel Edit Subsystem (PINE) edit messages by document type, identifying each PINE edit message, its corresponding code, and the corrective action needed to respond to the message. The following information will help you to use the procedure more effectively and to locate further assistance if needed.

How This Procedure Is Organized

The primary sections of this procedure are described below.

System Overview describes what PINE is used for and provides related background information, including a list of systems/procedures that may be used to research PINE edit messages.

PINE Edit Messages identifies the messages for all payroll and personnel actions by document type. Each message is printed on a separate page with the corresponding code and corrective action to be taken. The side tabs located on the right side of each page identify (1) the document type and (2) the PINE edit message code.

Pages are numbered by (1) document type and (2) actual page number within the document type. (Example: page 054.1 means Document Type 054, page 1.) If the procedure is amended, point pages (e.g., 054.1.1, 054.1.2, etc.) will be used as needed to accommodate additional pages. All amended pages will be marked at the bottom with the amendment number and date. If you begin receiving this procedure after it has been amended, you will receive the original copy with all amendments. Remove and insert pages according to the attached Page Control Chart so that your procedure is current.

What Conventions Are Used

This procedure uses the following conventions:

□ Edit messages are printed in italics. Example: *Date Of Separation Invalid*.

□ Field names within a paragraph are printed in bold. Example: The **Total Hours To Be Paid** field must be numeric and greater than zero.

□ References to figures within the text are printed in bold. Example: For a list of document types, see **Figure1**.

□ Important extra information is identified as a note. Example: **Note:** If the A/L Above Ceiling field is completed, it must always be later than the A/L Restored Field. The A/L Within Ceiling field must always be later than the A/L Above Ceiling field.

Who To Contact For Help

For questions about this procedure, contact the Government Employees Services Branch at **504−255−5322**.

For questions about payroll/personnel policies and regulations, contact your Committee For Agriculture Payroll/Personnel System (CAPPS) representative.

For questions about National Finance Center (NFC) processing, contact the Payroll Operations Branch at **504−255−4630.**

For questions about the system (including help with unusual conditions), contact Customer Service personnel at **504-255-5230.**

Section 2

System Overview

The Personnel Edit Subsystem (PINE) is a subsystem of USDA's Payroll/Personnel System. PINE edits data released from three Payroll/Personnel systems: personnel actions from the Personnel Action Processing System (PACT), payroll documents from the Payroll/Personnel Remote Entry System (PRES), and position data from the Position Management System (PMSO). PINE edits the data before it is applied to the Payroll/Personnel database, comparing the employee's database record to the data being entered. PINE processes personnel actions and payroll documents Monday through Friday of each week and on the first Saturday of the pay period, regardless of the effective pay period.

Actions that pass PINE edits with a current or prior effective pay period are sent to the Personnel Processing System (PEPL) to update the Payroll/Personnel database. Actions that are effective in future pay periods and pass the PINE edits are placed in the Future Inquiry System (FINQ). Actions that are held in FINQ are reedited through PINE every pay period, including the effective pay period. After being successfully reprocessed for the effective pay period, they are applied to the Payroll/Personnel database.

Personnel actions and payroll documents that do not pass the PINE edits (regardless of the effective pay period) are placed in the Suspense Inquiry and Corrections System (SINQ) and a PINE edit message appears on the Listing of Personnel Error Messages Report. Users should refer to this report and access SINQ to view and correct the actions being held in suspense. After these actions are successfully corrected through SINQ, they are returned to PINE, reprocessed, and (depending on the effective date), applied to the Payroll/Personnel database. If these reprocessed actions do not pass the PINE edits for a different reason, they are once again placed in SINQ. For more detailed information on correcting actions that are in SINQ, see the SINQ procedure.

PINE Edit Message Categories

PINE edit messages for all payroll and personnel actions are separated in this procedure by document type. A document type is a kind of action processed in PACT, PRES, or PMSO. Each document type is identified by an assigned number.

Some PINE edit messages apply to all actions; others apply to specific actions only. Due to this criteria, this procedure organizes the PINE edit messages into the following four categories:

ALL. PINE Edit Messages 001 through 049 apply to all actions; therefore, these messages appear only once in this procedure under Document Type ALL.

Specific Document Type. A specific document type identifies the kind of action being processed. For example, lump sum leave payments are identified as Document Type 054.

In some instances where the PRES and SINQ document types will not be the same as the PINE document type. For example, there are five PRES and SINQ programs (170, 171, 172, 173, and 174) for processing savings bonds, the PINE edit messages are all identified under Document Type 170. Therefore, no matter what SINQ program is used to correct the savings bond document in suspense, all the PINE edit messages for savings bonds are located under Document Type 170. For a list of document types, see **Figure 1**.

998 (Front-end System Interface (FESI) Position Data). Document Type 998 edit messages identify position data that was entered through agency-development front-end systems and processed through the Position Management System (PMSO) using the Front-end Systems Interface (FESI). FESI is the transmission interface between the agency-developed front-end system and USDA's Payroll/Personnel System. Position data entered through FESI that failed the edit process is placed in the Suspense Inquiry and Correction System (SINQ) for one pass and will be coded for deletion. Front-end system users must either (1) correct the position data in the front-end system and transmit a new record to NFC or (2) use PMSO to update or establish the position data. Position data that failed the edits cannot be corrected using SINQ.

999 (informational messages). Document Type 999 messages indicate that either some type of action must be initiated or a PEP51 activity was or was not successfully processed in PINE. Processing a payroll or personnel action through PACT, PRES, or PMSO may be required to satisfy those messages. For example, changes to certain data elements in PMSO (e.g., the pay plan on the PMSO master record) result in a Document Type 999 PINE edit message if a personnel action is not processed to update the employee's database record.

Override Codes

Override codes are used in SINQ to initiate a system function and release certain PINE edit messages that must be processed because of agency/department regulations, employment, or other unique conditions. Most codes are entered by the user during the correction process to either delete, process, or hold actions, or send them to the future file; others are system generated. For detaile *Updated 7/25/03* d information, see the SINQ procedure **.**

065	*6C Date Missing - Must Process 120 Doc To Update*

Description

A Multielement Update Document (Document Type 120) **must** be processed to establish a 6C Retirement Date whenever the data entered in the **Retirement Coverage** field is **6**, **E, M,** or **T**.

If data was not entered in the **Retirement Coverage** field, this message indicates that the retirement coverage code stored in the employee's database salary data record (IRIS Program 101) is 6, E, M, or T.

This personnel action will remain in SINQ for 3 PINE passes as a reminder that a Multielement Update Document **must** be processed to establish the 6C Retirement Date on the employee's database dates & misc sal/pers data record (IRIS Program 102). If there are no additional edit messages, this edit message will not appear after the 3rd PINE pass, and this personnel action will apply to the employee's database.

If a Multielement Update Document is **not** processed to establish the 6C Retirement Date, this edit message will be issued **again** whenever a personnel document(s) is system-generated or processed for this employee in the future. This edit message will not be issued once a Multielement Update document is successfully processed and the 6C Retirement Date is established on the employee's database dates & misc sal/pers data record (IRIS Program 102).

☞**Note:** The 6C Retirement Date identifies the retirement service computation date for employees appointed to law enforcement or firefighter positions entailing a special retirement deductions rate. This date must be established for employees to receive a Benefits Statement for Law Officers and Firefighters. For detailed instructions on processing a Multielement Update Document, see the **PRES Procedure**.☜

Document Type 063 - Personnel Action Input

Code	Message
107	*Verify Check Mail Address ZIP Code*

Description

Verify the **state, city, county codes** on the processing personnel action. Also verify the **ZIP Code** on the **processing action** against the **ZIP Code** that appears on the **Listing of Personnel Errors**. (The ZIP Code on the Listing of Personnel Errors is the ZIP Code recorded in the ZIPPLUS4 database for the state code entered on the processing action.)

☞**Note:** If the **ZIP Code** on the processing action is **correct**, key in *W* in the Override Code field. This will allow the ZIP Code specified on the processing action to be updated as the residence address ZIP Code for the employee.

Do **not** key in *W* in the Override Code field **if** the **ZIP Code** is **invalid** for the state code entered on the processing action. If the ZIP Code is invalid, key in the ZIP Code that is displayed on the Listing of Personnel Errors, which is the ZIP Code recorded in the ZIPPLUS4 database for the state code entered on the processing action. ☜

Code	Message
115	*Database Appointing Authority Not Valid*

Description

The employee's database **personnel** record (IRIS Program 123) contains an **invalid** appointing authority. All employees who have a service computation date (SCD) for leave of January 1, 1982, or later, must have a valid appointing authority. **Note**: If an employee's SCD for leave has been recomputed to later than January 1, 1982 as a result of excess leave without pay (LWOP) and the appointing authority on the employee's database **personnel** record (IRIS Program 123) is correct, type *P* (release Message 115) in the **Override** field.

If the appointing authority on the employee's database **personnel** record (IRIS Program 123) is **invalid**, process a NFC - 74, Master File Change Document, and enter the correct appointing authority in the **Appnt-NOA/1st-Auth/2nd-Auth** field to update the database personnel record with the proper appointing authority. **Note**: This action will remain in suspense until the NFC-74 document is processed and applied to the employee's database record.

245	*Organizational Structure Code Cannot Change W/NOAC*

Description

The data entered in the **1st NOA Code** field indicates that a **change** in the Position Management System (PMSO) **organizational structure code** field **cannot** be processed. A change in the PMSO organizational structure code can **only** be processed **if**: (1) the data entered in the **1st NOA Code** field is **one** of the **following codes** or (2) the data entered in the **1st and 2nd NOA Code** fields indicates a **correction** to one of these codes :

- 500-599, 934, 954, 956, 987 (Conversions)

- 702 (Promotion)

- 703 (Temporary promotion)

- 713 (Change to lower grade)

- 721 (Reassignment)

- 740 (Position change)

- 741 (Position change - NTE))

- 790 (Reassignment)

- 936 (Reassignment - NTE)

- 938 (Termination of reassignment - NTE)

- 986 (Change to lower grade)

- 991 (Termination - temporary appointment)

A change in the PMSO organizational structure code may also be processed if the data entered in the 1st and 2nd NOA Code fields indicates a correction to one of the following codes:

- 100-199, 900, 902, 906-907, 911, 933, 928, 953, or 955 (Appointments)

Document Type 063 - Personnel Action Input

Code	Message
466	*Work Schedule And Salary Rate Incompatible*

Description

When the data entered in the **Pay Plan** field indicates a general schedule pay plan and the data entered in the **Work Schedule** field indicates a full-time, part-time, or intermittent work schedule, then the data entered in the **Salary Rate Code** field must be **PA**.

☞**Note:** This message does not apply for those employees serving as an expert or consultant (pay plans **EC** through **EI**).

When the data entered in the **Work Schedule** field and the **Special Employee Code** fields indicate that the employee is being paid bi-weekly, monthly, on a fee basis, or piece work, the data entered in the **Salary Rate Code** field must be **BW**, **FB**, **PM**, or **PW**.

☞**Note:** This message does **not** apply to:

- wage grade employees

- employees who have an alternating tour of duty

- or if the **Special Employee Code** is **04** (FmHA County Committeeperson)

Data Element(s) Used In Audit

Code	Message
502	*Effective Date And Base Salary Not Valid*

Description

The date entered in the **Effective Date** field is **not** valid with the data entered in the **Base** (scheduled) **Salary** field.

The amount entered in the **Base** (scheduled) **Salary** field was found in the Table Management System (TMGT), **Table 029**, Pay Table Rates. However, the effective date on the processing personnel action and the date of the record that contains the salary amount in Table 029 are **not** the same. Verify the effective date of the processing action and the amount of the base (scheduled) salary amount.

When a cancellation or correction action is processed with a **prior** effective date, obtain the necessary data for the prior action(s) by reviewing the employee's Official Personnel Folder (OPF) and the appropriate screens in the employee's database. Contact your agency representative if you must correct or cancel actions with dates prior to the data stored in Table 029.

069	*Plan Code 23 Requires Age 35 Or 3 Years Of Service*

Description

When the retirement plan code entered in the **Plan Code** field is **23** (TIAA retirement), the employee must be at least **35 years of age** or have **3 years of service** with Agency 71, 73, or 77.

Note: The **entered on duty date** (accession date) was used to certify the length of service requirement. However, since any prior service as a Trust employee can be used in determining eligibility, the entered on duty date cannot be the sole standard for meeting the length of service requirement.

Therefore, if it has been determined that the 3-year service requirement has been met and that the retirement plan code entered in the **Plan Code** field is correct, type in *C* (release Message 069) in the **Override** field to release this message.

056	*Contribution Amount Exceeds Maximum Amount*

Description

The **Contribution Amount** field **exceeds** the **maximum deduction allowed** for the employee.

The **Contribution Amount** field **cannot exceed 15 percent** of the employee's adjusted salary as recorded on the employee's database **salary data** record (IRIS Program 101) if the employee is covered by the **Federal Employees' Retirement System** (**FERS**).

The **Contribution Amount** field **cannot exceed 10 percent** of the employee's adjusted salary as recorded on the employee's database **salary data** record (IRIS Program 101) if the employee is covered by the **Civil Service Retirement System** (**CSRS**).

Note: When the special employee code recorded on the employee's database **dates & misc salary/personnel** record (IRIS Program 102) is **01**, **02**, **03**, or **08** (which designates the employee eligible for Administratively Uncontrollable Overtime (AUO)), then the AUO percent up to the maximum rate of 25 percent is calculated into the adjusted salary before determining the maximum deduction.

Code	Message
070	*Total Severance Fund Results In A Negative Balance*

Description

This edit message is issued when a **correction** is being processed to change the **total severance fund**, but the amount entered in the **Total Severance Fund** field will result in a negative balance.

For example: When the **initial total severance fund** was established, the amount of the **total severance fund** was **$1000.00**. The employee has been **paid $900.00** so far. The correction action is attempting to **change** the **total severance fund** to **$850.00**. Since $900.00 has already been paid to the employee, this correction would result in a **negative balance** of **$50.00 (-50.00)**.

Document Type 165 - Authorization For Restored Annual Leave

Code	Message
058	*Total Amt Annual Lv Restored Gr Than Yearly Max*

Description

The amount of hours in the **Amount Annual Leave Restored** field is **greater than** the **maximum** amount of annual leave allowed for the employee. The maximum amount of annual leave that can be restored for any employee is the employee's annual leave category multiplied by 26.

☞**Note:** In the event that this message is not applicable to this employee, type *C* (release Message 058) in the **Override** field..✑

Code	Message
055	*Court Ordered - Cannot Waive Or Cancel Enrollment*

Description

When the **Transaction Code** field is **3** (waive) or **6** *(*cancel), the **FEHB coverage code** on the employee's database **health benefits** record (IRIS Program 115), cannot be one of the following:

- **6** (court order - enrolled)

- **7** (court order - eligible pending - to family coverage)

- **8** (court order - self-only coverage to family coverage)

When the **FEHB coverage code** is **6**, **7**, or **8** on the employee's database **health benefits** record (IRIS Program 115), the employee is required by a court or administrative order (Public Law 106-394, Federal Employees Health Benefits Children's Equity Act of 2000) to provide health benefits coverage for his/her child(ren). Therefore, the employee cannot waive or cancel his/her FEHB coverage. He/she must be enrolled in a health benefit family plan.

Code	Message
057	*Court Ordered - Must Elect Family Coverage*

Description

When the **Transaction Code** field is **1** (new enrollment), **7** (reinstatement), or *8* (transfer in) and the **FEHB coverage code** on the employee's database **health benefits** record (IRIS Program 115) is one of the following:

- **6** (court order - enrolled)

- **7** (court order - eligible pending - to family coverage)

- **8** (court order - self-only coverage to family coverage)

The employee is required by a court or administrative order (Public Law 106-394, Federal Employees Health Benefits Children's Equity Act of 2000) to provide health benefits coverage for his/her child(ren); however, the **third position** of the **Enrollment Code** field identifies the **option code** as being a self only health benefit plan - **1** (single high) or *4* (single low).

Since the employee is required to provide health benefit coverage for his/her child(ren), the **third position** of the **Enrollment Code** field **must** be **2** (family high) or **5** (family low).

022	*Duty Station Chg May Require New Tax Documents*

Description
The employee's **duty station** was **changed**, possibly causing a change in state taxes. Check the new duty station and the employee's database record (IRIS Program 101) to determine if the new duty station will require the processing of a new withholding state tax form. The new tax state form should be processed in the Payroll/Personnel Remote Entry System (PRES) Program DP140, State Income Tax Certificate.

Code	Message
023	*HIT Wages YTD Missing - Process Mstr File Chg Doc*

Description
The employee is transferring from another Federal department under a FICA retirement plan (Retirement Coverages Code C, E, G, R, or T). To prevent the employee from exceeding the maximum annual earnings subject to the Hospital Insurance Tax (HIT), you must enter the HIT wages from the previous department into the Payroll/Personnel System.   Process an NFC-74, Master File Change Document, in the Payroll Personnel Remote Entry System (PRES) Program DP031. Complete the **Hosp Ins Tax Wages YTD** field with the amount to be carried forward.   To verify that the data applied, access the Information/Research Inquiry System (IRIS) Program 103, Salary YTD Data.
